

Ground Water Reflection Questions

These questions can be used in several different ways; any are fine. A class discussion could be held where students answer the questions, students can be divided into groups where they generate group answers then present their findings, students can be given the questions as a writing assignment in the form of a journal or quiz, or the questions could be used throughout the process to check in with students on a daily basis.

1. Did you learn more about ground water and where water comes from by completing this unit?
2. Where can you use this information in your daily life?
3. Did you learn more about your community by completing this unit?
4. Is it important to be involved in one's community by completing service projects that inform people about important topics?
5. What other environmental topics would you like to learn about?
6. How can you reduce your daily water use?
7. How will your family use this information?
8. What do you think would happen if no one took care of the water and it became very polluted?
9. What does the phrase, "Water, water everywhere but not a drop to drink" mean?
10. How would your life change if you had only three gallons of water to use each day?
